

1) Ceramic Anilox Roll

First-Rate Quality In The World

Product Characteristic:

- Adopting The Yag Laser Engraving Technique And Thanks To Its Multi-Pulse Application, The Cells Are Characterized Of Chiseled Shape, Smooth Cell Wall And Significant Improvement Of Ink Release Function, Which Can Meet The High-Precise And Flexible Printing Requirements, And Is Easy To Clean. It Also Features An Excellent Performance Such As Abrasion And Erosion Resistance, Stable Print Quality, Long Effective Life Time, Low Composite Cost With The

Product Parameters:

- Screen Scope: 20-1800 Lpi
- Diameter Range: 40-600 Mm
- Maximum Width: 5000 Mm
- Cell Shape: 60° Hexagon; 30° Hexagon; 45° Diamond; 45° Helix

Application:

- Wide Flex o Press
- Narrow And Label Flex o Press
- Corrugated Paper Printing Machine
- Convert And Lamination
- Uv Coating

2) Magnetic Cylinders

- We Supply **Magnetic Cylinders** And Flexible Dies With A Great Cost-Saving Alternative To Traditional Solid Rotary Dies. Each Cylinder Is Machined With Automated Cnc Machinery To Assure Accuracy And Consistency. The Cylinders Are Machined From Stainless Steel And Include Fully-Hardened Replaceable Bearers To Assure You Many Years Of Trouble-Free Production. Each Cylinder Is Filled With Ceramic And Rare Earth Magnets. The Magnetic Cylinders Are Available For All Types Of Label Presses And Converting Machinery.

Please Contact Us For Additional Information For Your Label Die Cutting Requirements.

3) Monopodium Magnetic Powder Brake

Magnetic Powder Brake Is Applied In Unreeling. Match With Tension Controller To Use.

Summary:

- The Magnetic Powder Clutch And Magnetic Power Brake Are Utilize Magnetic Powder Under The Galvanometric Effect To Transfer Torque, It Has Advantages Of Magnetizing Current And Transmit Linear Relationship And Rapid Response Speed, Simple Structure, No Impact, No Vibration And No Noise, No Pollution .It Is A Multi-Purpose, Superior Performance Of Automatic Control Components, Widely Used In Various Industries Of Machinery Loading, Brake And Compressing Loading System And Rewinding Tension Control Winding.

4) Magnetic Powder Clutch

Magnetic Powder Clutch Is Applied In Winding Tension. Match With Tension Controller To Use.

Summary:

- The Magnetic Powder Clutch And Magnetic Power Brake Are Utilize Magnetic Powder Under The Geomagnetically Effect To Transfer Torque, It Has Advantages Of Magnetizing Current And Transmit Linear Relationship And Rapid Response Speed, Simple Structure, No Impact, No Vibration And No Noise, No Pollution .It Is A Multi-Purpose, Superior Performance Of Automatic Control Components, Widely Used In Various Industries Of Machinery Loading, Brake And Compressing Loading System And Rewinding Tension Control Winding.

5) Air Shafts

Manufactured With Quality Material Provides Durability & Reliability With Firm Grip On Core Material, The Shaft As A Whole Expands And Contracts, And Is Suitable For Core less Or Multiple-Core (Slitter,Etc) Applications. The Torque Is Uniform Across The Face Width (Lower Torque Transmission Than The Parallel Lug Type).

6) Rotary Machine Printing Plate Cylinders

We Offer Qualitative Range Of **Rotary Machine Printing Plate Cylinders**. These Are Fabricated Using Sophisticated And Advanced Machines With The Assurance Of High Accuracy. Every Print Cylinders Offered By Us Are Fabricated Within Or Better Than Oem Specifications In Terms Of Taper, Diameter And Total Indicator Readout (Tir). In Addition To This, We Offer These Products As Per The Exact Requirements Of The Clients On The Basis Of Details Provided By Them.

Features Of The Range Include The Following:

- Optimum Performance
- Dimensionally Accurate
- Low Maintenance

7)Flexible Cutting Dies

Flexible Label Cutting Dies Combine The Benefits Of Performance Plus Cost Savings—All In One Product! For Most Converting Operations, Flexible Dies Have Evolved Into An Integral Component Thanks To Lower Costs Without The Need To Compromise On Quality. Our Dies Start From Hardened Spring Steel, And Utilize Computer-To-Plate Technology, Chemical Etching And Machine Sharpening.

Ideal For Nearly All Materials And Applications, Our Flexible Dies Can Be Made To Cut Pressure-Sensitive, Metal-To-Metal, Two-Level, Crease, Perf Or Slit-Over-Serf Applications. We Also Offers Standard Or Extended-Life Dies, Which Provide Greater Durability When Converting

Please Contact Us For Additional Information On These Products.

8). Solid Die Cutting Cylinders

We Supply An Exclusive Range Of Band Aid Dies/Solid Die Cutting Cylinder That Is Manufactured Using Superior Grade Raw Material That Is Sourced From The Certified Vendors Of The Market. Our Entire Range Of Band Aid Dies Is Extensively Used For Various Industrial Purposes Due To Its Durable Finish Standards, High Tensile Strength And Reliability. Further, Our Valued Clients Can Avail The Offered Product From Us At The Most Affordable Price.

Features:

- Robust Construction
- Sturdiness
- High Durability
